

FRUITPATE

DK Fruitpate is a complementary food for tropical and native frugivorous birds such as; honeycreepers, tanagers, chlorophonias, euphonias, cotingas, manakins, sunbirds, pitpits, finches and waxbills.

Features and Benefits of DK Zoological Fruitpate

- * Contains all the ingredients necessary for optimal condition in young and parent birds
- * Low iron content to prevent iron storage disease
- * Designed to be the base diet for fruit-eating birds
- * Highly palatable
- * Contains pieces of fruit

Feeding Guide

DK Fruitpate can be provided unrestricted throughout the year. Should be refreshed daily. Fruitpate is ideally fed in combination with fresh fruits. For example: figs, palmfruits, papaya, mango, apple and forest fruits are suitable.
